8th September 2010

Your ref: ENTRI4/PO/rpv/ares(2010) 605541

Dear M Ortun,

PLA/PLT Device Policy

Thank you for your recent letter in response to mine of 28th June 2010

Whilst I note the points that you make in your response, I do feel that your position overlooks some fundamental issues with these devices. It is simply not the case that introduction of a standard will cause the interference problems to cease. The Ofcom PA report and independent measurements and field trials point to a major upcoming issue with the integrity of the radio spectrum, and the mitigation measures being mentioned will do little to reduce the problems.

Rather than continue an exchange of letters, I wonder if I could meet with you or one of your senior advisors involved in this matter. I would like to be able to explain the issues being overlooked, and seek some review of the Commission's position.

This is an important matter for the future of an invaluable natural resource, and I do hope you will agree to facilitating a meeting.

I am overseas now until 4th October, but look forward to your reply on my return.

Yours sincerely

Donald F Beattie
Technical Director
