IBP = International Beacon Project. Beacons transmit for ten seconds on each
frequency in turn in the sequence shown above. They send callsign at 22 wpm

Latest Update 25/10/26 by Steve G0KYA

Denotes 10m beacon heard/spotted in 2020-2026 by G0KYA,ZL2iFB or by the Reverse Beacon Network. If you hear a beacon that is not listed please let us know by emailing psc.chairman@rsgb.org

Freq Call To
wn Loc ERPw Ant Direct Mode Status

and 100 watts, then four 1-second dashes at 100w, 10w, 1w and 0.1w.
Equipment is TS-50, Cushcraft R-5 multiband vertical and a Trimble Navigation GPS receiver to ensure synchronization, with a control unit built by NCDXF.

DK0WCY/DRA5

zz DK0WCY 3579 operates 0720-0900UTC and 1600-1900UTC LOCAL time (ie UTC+1 winter and UTC+2 summer) DRA5 and DK0WCY on 10144 are currently part-time. Transmissions on 3579 are cw only, with beacon id interrupted at ten minute intervals by a datagram giving the Kiel K, current fof2 and MUF at Juliusruh and indications of current solar-geophysical events. DRA5 and DK0WCY on 10MHz carry the cw datagrams but, at 10 minutes after the hour, the datagram transmission is on RTTY and contains additional information on x-ray background and hf2, using RTTY. The H+50 transmission is PSK31(BPSK) is used.
During auroral events the carrier at the end of the ID changes to a series of dots.
See also www.dk0wcy.de.

OK0EU

OK0EU is a cluster of five high-stability transmitters with 4Hz separation, running for multipoint measurement. The callsign is sent 40Hz up to identify ionospheric echoes. Output power 1 watt to dipole radiating N-S. Transmitters are
on 3594.492 at Vackov (JO60EF), 3594.496 Diouha Louka (JO60TP), 3594.500 Panska Ves (JO70GM), 3594.504 Pruhonice (JN79GX), 3594.508 Kasperske Hory (JN69SD)

LA2BCN

LA2BCN operates 10-min cycle. Min 0-1
